COMMUNICATION MAST COLLAPSES ON GRIDCo TOWERS

Wednesday, November 10, 2021 – At 15:40 GMT on Tuesday, November 9, 2021, a communication mast collapsed and fell on the 330kV Aboadze – Kumasi Transmission Line, resulting in the collapse of two adjacent towers. The incident happened near Bogoso in the Western Region.

This has affected the national power system and may result in some load management.

GRIDCo is working around the clock to replace the fallen towers within the shortest possible time.

GRIDCo is committed to maintaining a stable network for reliable and efficient power delivery.

We apologise for any inconvenience caused.
