FOR IMMEDIATE RELEASE

Tema

16th August, 2026.

UPDATE: TOWER REPLACEMENT WORK ON ASHAIMAN SECTION OF 161kV TEMA– ACHIMOTA TRANSMISSION LINE

The Ghana Grid Company LTD. (GRIDCo) wishes to inform the public that it has successfully completed the initial phase of repair works on the Ashaiman section of the 161kV Tema–Achimota transmission line.

A team of GRIDCo engineers undertook the preliminary works on Sunday, 16 August 2026. Power has since been restored to customers, and GRIDCo appreciates the public's cooperation and understanding.

The remaining phase of the work, which involves the replacement of the affected transmission tower following a welding explosion in July, will be undertaken on Sunday, 23 August 2026.

In collaboration with the Electricity Company of Ghana (ECG), we will provide prior information to customers and communities in areas that may be affected by the planned works, including any associated power supply interruptions.

GRIDCo will continue to work diligently to complete the tower replacement and restore the full integrity, reliability, and resilience of the transmission line.

We appreciate the patience, understanding and cooperation of the public as GRIDCo works progressively to complete this critical work.
